## **Precision Optics Corporation, Inc. Completes Initial Order with Sony Medical**

GARDNER, MA, December 9, 2014 – Precision Optics Corporation, Inc. (OTCQB: PEYE) (the “Company”) announced today that it has completed an initial order for a new surgical microscope video adapter for Sony Electronics’ Medical Systems Division.

The adapter, called ‘3D Simplicity’ is an integrated video adapter system that facilitates integration of Sony 3D camera technology into a range of ophthalmic surgical microscopes. This enables the presentation of high definition imagery of microscopic ophthalmic surgery onto 3D monitors and enables 3D high definition recording of these procedures. This new system was announced by Sony Medical in October 2014, and demonstrated at the American Academy of Ophthalmology 2014 Annual Meeting.

Precision Optics CEO, Joseph Forkey, commented, “This order is indicative of the caliber of our customers and represents additional validation of the quality of our product offering. We are excited about the launch of the Sony 3D Simplicity video adapter and are optimistic that market acceptance of the technology will result in follow-on orders. The combination of Precision Optics’ ability to design and manufacture world-class optical medical devices, particularly those requiring precise alignment for 3D imaging, along with Sony Medical’s market leading 3D High Definition cameras and great reputation in the medical imaging space, make products like these possible. We look forward to an ongoing collaboration with Sony on this and other applications and technologies.”

As part of the order, Precision Optics Corporation is the exclusive provider of the 3D Simplicity video adapter for Sony Medical.

### **About Precision Optics Corporation**

Precision Optics Corporation has been a leading developer and manufacturer of advanced optical instruments since 1982. The Company designs and produces next generation medical instruments, Microprecision™ micro-optics with characteristic dimensions less than 1 millimeter, and other advanced optical systems based on the Company’s state-of-the-art optical technologies. The Company’s innovative medical instrumentation line includes Lenslock™ laparoscopes, arthroscopes, and sinusscopes, as well as endocouplers and a world-class product line of 3D endoscopes for use in minimally invasive surgical procedures. The Company’s website is [www.poci.com](http://www.poci.com). Investors can find Real-Time quotes and market information for the Company on [www.otcm Markets.com/stock/PEYE/quote](http://www.otcm Markets.com/stock/PEYE/quote).

### **About Forward-Looking Statements**

This press release contains forward-looking statements. Forward-looking statements include, but are not limited to, statements that express our intentions, beliefs, expectations, strategies, predictions or any other statements related to our future activities or future events or conditions. These statements are based on current expectations, estimates and projections about our business

based, in part, on assumptions made by our management. These statements are not guarantees of future performances and involve risks, uncertainties and assumptions that are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in the forward-looking statements due to numerous factors, including those risks discussed in our annual report on Form 10-K and in other documents that we file from time to time with the SEC. Any forward-looking statements speak only as of the date on which they are made, and we do not undertake any obligation to update any forward-looking statement to reflect events or circumstances after the date of this report, except as required by law.
